Bhopal, Madhya Pradesh, India | Phone: 6261804363 | Email: rneetesh03@gmail.com
LinkedIn: linkedin.com/in/neetesh-rajpoot | Github: github.com/neetesh-rajpoot-18

PROFILE

Computer Science Engineering student specializing in Data Science with strong skills in Python, SQL, Java. Experienced in building predictive models using real-world datasets. Proficient in Data Structures & Algorithms and data analysis, with hands-on experience in NumPy, Pandas, Scikit-Learn, Seaborn and Power BI. Seeking a Data Science / Data Analytics role to apply analytical and problem solving skills.

EDUCATION

Bachelor of Technology Oriental College Of Technology, RGPV	2022 – 2026
Branch: Computer Science and Engineering with Specialization Data Science	CGPA: 6.691

TECHNICAL SKILLS

Programming Languages: Java, Python
Core Concepts: Data Structures and Algorithms (DSA), DBMS
Databases: SQL, MySQL (queries, joins)
Python Libraries: NumPy, Pandas, Scikit-learn
Data Visualization and Analysis: Power BI, Excel, Seaborn
Tools & Platforms: Git, GitHub, Jupyter Notebook, Visual Studio Code

PROJECTS

HR Attrition Analysis, Prediction & Dashboard

- Performed EDA on HR dataset of 1,470 employees to uncover attrition patterns across departments, job roles, agegroups, and satisfaction levels using Seaborn (heatmaps, count plots, distribution charts).
- Trained a Random Forest Classifier using Scikit-learn to predict employee attrition (Yes/No); evaluated model with accuracy score, confusion matrix, and feature importance to identify key attrition drivers.
- Developed a multi-page interactive Power BI Dashboard with KPI cards (Attrition Rate: 16.1%, Count: 237, Total Employees: 1,470, Avg Satisfaction: 2.74) and 5 dynamic visualizations.
- Implemented drill-through functionality, department filter buttons (HR, R&D, Sales), and DAX measures for dynamic KPI calculations across gender-split attrition and job role charts.

Tools: Python (NumPy/Pandas/Scikit-learn/Seaborn), Jupyter Notebook, Power BI, DAX, Excel

Cricket Stats Analysis Dashboard

- Analyzed player/team metrics (batting avg, strike rate, bowling economy) across ODI, T20, and Test formats.
- Built ETL pipeline using Python and SQL for data cleaning and automated reporting.
- Created interactive visualizations for top performers, consistency trends, and head-to-head comparisons.

Tools: Python (NumPy/Pandas), SQL, Excel, Power BI, Seaborn

EXTRACURRICULAR

- Participated in RGPV Nodal Cricket Tournament 2022

CERTIFICATIONS

- Introduction to Python
- MySQL with Information Technology
- 30 Days Power BI Micro Course SkillCourse (ISO 9001 Certified) | May 2026
